**READY IN FIVE**  
MAKEUP SET

## STEP 1

### Pollution Defense CC Cream Broad Spectrum SPF 30

- Dispense a ten cent-size amount to your fingertip, dab evenly onto your cheeks, forehead, nose, and chin. Blend all over using your fingers. A makeup sponge can be used to soak up excess product.

*TIP: Don't forget to blend down the jaw into your neckline!*

## STEP 2 – CHOOSE ONE

### Shape It Up Tinted Brow Cream

- Comb the wand upward through brow hair starting from the inner corner of your brow.

### Shape It Up Brow Pencil

- Use the brush end to comb through brows before you start.

- With the pencil, apply light strokes in the direction of hair growth, moving from inner corner to outer corner of brow, filling in any gaps.

- Brush again to comb product through (this makes it look natural).

## STEP 3

### Blush

- Using your finger or a brush, lightly apply blush to the apples of cheeks (smile and they'll come out!). Alternatively, you can sweep the blush along your natural cheekbones.

## STEP 4

### Speak Volumes Mascara

- For upper lashes, apply mascara from the base of lashes up and outward. Repeat until you have the desired volume and thickness.

- For lower lashes, turn the brush vertically and use the tapered end of the brush for a bolder look.

*TIP: Don't re-dip the brush. That can cause clumping and no one wants clumpy lashes!*

## STEP 5

### Glossed Over Lip Gloss

- Glide onto lips and layer to your liking.
